Our Project Executive Summary

The main emphasis of the project is on the development of the website named NAVO ZONE that is built as an online shop for a business dealing in handmade resin products. This website has been developed using programming languages such as HTML, CSS, and JavaScript to create an advanced interface for customers to shop online conveniently. The system enables the user to view products, collections, sign up as a customer, add/remove items from their shopping cart, and proceed with the checkout process. Additionally, information about the business, payment options, and social media accounts is available on the website.

01.INTRODUCTION

1.1 Introduction

NAVO ZONE is a handmade resin product business that produces unique and customized items such as jewelry, keychains, bookmarks, home décor products, gift items, and preserved flower designs.

In today's digital era, online shopping platforms play a crucial role in business expansion. Therefore, this website is developed to enhance customer accessibility and improve business visibility through an online platform.

The website is built using **HTML, CSS, and JavaScript**, ensuring responsiveness and usability across different devices.

1.2 Objectives

The main goals of this project are,

- To design and develop a professional website for NAVO ZONE.
- To showcase handmade resin products effectively.
- To provide product information including descriptions and pricing.
- To improve customer communication through online contact channels.
- To implement shopping cart and checkout functionalities.
- To demonstrate practical web development skills.

1.3 Scope of the Navo Zone Website

The NAVO ZONE website allows customers to explore and purchase handmade resin products through an online platform.

Key Functional Scope:

- **Product Catalog Management**
  Products are displayed with images, descriptions, and prices, categorized for easy navigation.
- **Customer Registration and Login**
  Users can create accounts and access personalized services.
- **Shopping Cart System**
  Users can add, remove, and manage selected products.
- **Checkout System**
  Secure order placement with delivery and payment options.
- **Product Collections**
  Products are grouped into categories such as jewelry, gifts, home décor, and preserved flowers.
- **Business Information**
  Provides company details, contact information, and social media links.
- **Payment and Delivery Information**
  Displays available payment methods and delivery details.

The website covers the following functionalities:

- Product display
- Product categorization
- Customer registration
- Product details viewing
- Add to Cart functionality
- Buy Now functionality
- Shopping cart management
- Checkout process
- Business information display
- Contact information
- Social media integration
- Payment information display
- Promotional offers display
- Responsive website design

02. Business Analysis

2.1 Business Overview

NAVO ZONE is a business that makes things by hand using resin. They are really good at making products that look nice. NAVO ZONE focuses on being creative and making sure the products are good quality.

The products that NAVO ZONE makes are for people to use themselves or to give as gifts. You can also buy these products for events like weddings or anniversaries. Some people even buy them to decorate their homes. NAVO ZONE products are suitable, for lots of occasions.

2.2 Business Description

- **Business Name:** NAVO ZONE
- **Business Type:** Handmade Resin Product Business

Products Offered:

• Resin Jewelry
• Resin Keychains
• Resin Bookmarks
• Resin Pens
• Resin Home Décor
• Resin Gift Sets
• Resin Name Boards
• Flower Preservation Products
• Customized Resin Products

Target Customers:

• Students
• Young Adults
• Gift Buyers
• Wedding Customers
• Home Décor Enthusiasts
• Customers Seeking Personalized Handmade Products

03. SYSTEM REQUIREMENTS ANALYSIS

3.1 Functional Requirements

The website shall,

- Display company information.
- Display featured products.
- Display product collections.
- Display product images and prices.
- Provide navigation between pages.
- Provide a customer registration page.
- Provide a login page.
- Provide shopping cart functionality.
- Provide checkout functionality.
- Display payment methods.
- Display social media links.
- Provide contact information.
- Allow users to browse products by category.

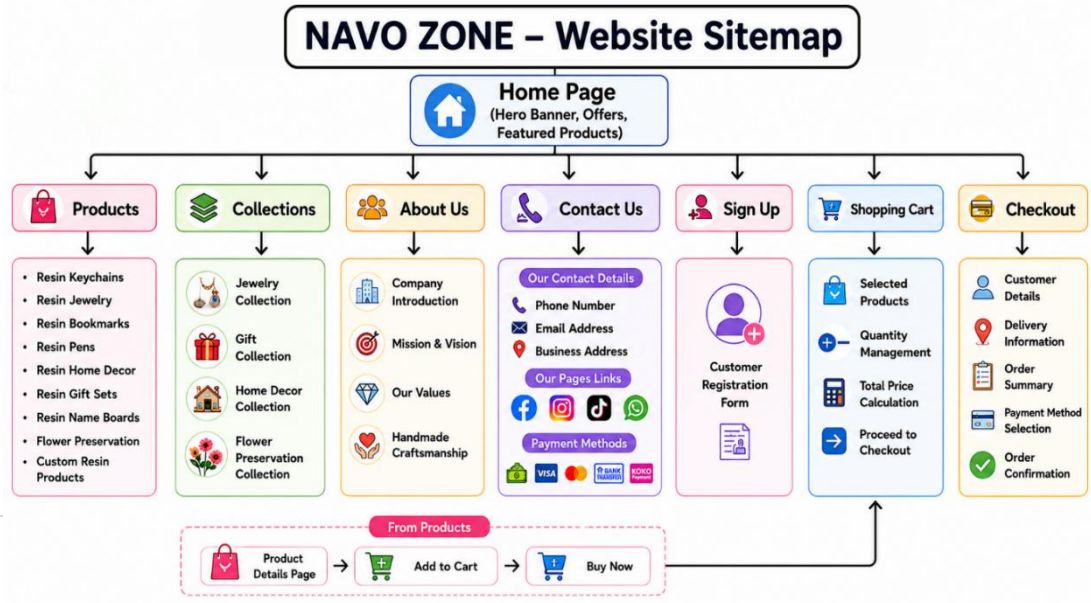

3.2 Non-Functional Requirements

The system shall:

- Be responsive across all devices
- Be user-friendly and intuitive
- Load efficiently
- Maintain design consistency
- Provide easy navigation
- Ensure smooth performance

04. WEBSITE STRUCTURE

4.1 Website Sitemap

4.2 Structure of the Homepage

The homepage acts as the entry point of the NAVO ZONE website. It provides the users with information about the company, its featured products, offers, and website sections. Below are the various homepage elements designed to improve user interaction.

Header/Navigation Bar

The header includes the NAVO ZONE logo along with its navigation bar. Through this bar, the users can navigate through different sections of the website like Products, Collections, About Us, Contact Us, Sign Up, Shopping Cart, and Checkout pages.

Hero Banner

The hero banner is the first section featured on the homepage of the site. It showcases visually appealing images of the hand-crafted resin products along with the marketing text and CTA button like “Shop Now.”

Featured Products Section

This section shows selected products offered by the website. In each card, product images, prices, and action buttons are included.

Promotions/Offers Section

This section is used for displaying any discounts and offers on specific products in order to attract more customers and promote sales**.**

Collection Section

Under the collection section, products are classified into categories like Jewelry Collection, Gifts Collection, Home Décoration Collection, and Flowers Preserving Collection. This helps clients search for products based on their preferences.

Footer Section

The footer includes all essential information about the company like the contact information, social media links, payment methods, and delivery methods. This makes it easy for users to find essential information within the website.

4.3 Website Pages

NAVO ZONE comprises several website pages that ensure customers enjoy the online shopping experience.

Home Page

The Home Page is where the visitor meets NAVO ZONE and is introduced to featured products, offers, collections, and other website essentials.

Products Page

The Products Page shows all handmade resin products customers may order. Visitors get an opportunity to check products, their features, prices, and make their choice.

Collections Page

The Collections Page allows sorting products according to categories. Customers may look through the products grouped according to customers' tastes and preferences.

About Us Page

The About Us Page informs visitors about NAVO ZONE. The company gives its customers information about its mission, vision, values, and the importance of handmade products.

Contact Us Page

The Contact Us Page contains information on how to reach us. Business contacts, social network links, payment methods, and customer service channels are mentioned here.

Sign Up Page

The Sign Up Page makes it easy for customers to register themselves. The registration process allows customers to interact with our website more effectively.

Shopping Cart Page

The Shopping Cart Page lists the products selected by a customer. It shows how many items there are, how much the cost will be.

Checkout Page

The Checkout Page enables customers to fill out shipping details, verify orders, choose from available payment options, and complete purchases.

05. USER INTERFACE DESIGN

5.1 Design Concept

The NAVO ZONE website features a stylish, modern design with a neat and aesthetically pleasing layout. The key idea behind this design is capturing the creative nature and uniqueness of products made of resin. The design chosen by the company is minimalist and artistic.

5.2 Color Scheme

The NAVO ZONE color scheme is soft and aesthetic, in line with the image of the brand.

- Main Color: Light Blue (#D7E9FF)
- Secondary Color: White (#FFFFFF)
- Accent Color: Blue (#4A90E2)

The colors used help convey the professional and elegant atmosphere of the website, emphasizing necessary elements.

5.3 Typography

Poppins font family from Google Fonts was used for the website. The decision to use this font was made because of its contemporary design, readability, and scalability.

5.4 Navigation Bar Design

The design of the navigation bar has been done to facilitate easy navigation within the website by providing access to all important pages. The following pages can be navigated to via this menu:

- Home
- Products
- Collections
- About Us
- Contact Us
- Sign Up
- Shopping Cart

This helps improve user navigation on the website.

5.5 Product Card Design

Each product is shown through product cards on the website. Each product card will contain:

- Product image
- Product name
- Product price
- Add to cart button
- Buy now button

This helps provide users with product information easily.

5.6 Responsive Design

This website has been designed to be entirely responsive and can work well across various screen sizes. It will be usable on:

- Desktops
- Laptops
- Tablets
- Smartphones

06.TECHNOLOGIES USED

Front-End Technologies

The website was developed using core front-end technologies:

- **HTML5** – Used for structuring the website content and layout.
- **CSS3** – Used for styling, design, and overall visual presentation of the website.
- **JavaScript** – Used to add basic interactivity and dynamic functionalities such as button actions and shopping cart behavior.

Development Tools

- **Notepad++** – Used as the main code editor for writing HTML, CSS, and JavaScript code.
- **Google Chrome** – Used for testing, debugging, and previewing the website during development.

Design Resources

- **Pinterest** – Used as a reference for design inspiration and UI layout ideas.
- **PNG Icons** – Used for social media icons and user interface elements.
- **Product Images** – Collected from online sources and used to showcase products.
- **Google Fonts** – Used to enhance typography and improve visual appearance.

Development Support

The development process was supported through multiple learning and assistance sources, including lecturer guidance, self-learning, and online tools.

- **Lecturer guidance** – Provided theoretical understanding and direction for the project requirements and implementation.
- **Self-learning** – Used to understand HTML, CSS, and JavaScript concepts and apply them in practical development.
- **ChatGPT** – Used as an assisting tool for debugging code issues, improving website functionality, and clarifying development concepts during the project.

Hosting Platform

- The website was developed and tested locally using a browser environment and was not deployed to a live hosting server.

07.FEATURES OF THE WEBSITE

WEBSITE FEATURES

There are a variety of features on the NAVO ZONE website, all geared toward providing an excellent user experience, which will aid users while shopping online:

- Featured Products
- Products Collections

- Promotional Offers
- About Us Page
- Contact Page
- Customer Registration
- Carting System
- Checkout System
- Social Media Links
- Payment Details

List of Payments Supported:

There are a number of payment methods supported on the website, as follows:

- Cash on Delivery
- Visa
- Master Card
- Bank Transfer
- Koko Payment

08.TESTING AND EVALUATION

The website was tested to ensure that all features function correctly and provide a smooth user experience. Testing was carried out during and after development to identify and fix any errors.

Test Cases

Test Case	Expected Result	Actual Result	Status
Homepage loading	Loads successfully	Successful	Pass
Navigation links	Open correct pages	Working correctly	Pass
Product display	Show products correctly	Working	Pass
Images loading	Display properly	Successful	Pass
Registration form	Accept input	Working	Pass
Cart system	Add/remove items	Functional	Pass
Checkout	Process order	Successful	Pass
Contact form	Send message	Working	Pass
Responsive design	Adapt to devices	Responsive	Pass

Testing Results

The performance of all core functionalities of the NAVO ZONE website was successfully conducted. The NAVO ZONE website demonstrated efficient performance when it comes to the aspect of navigability, responsiveness, products display, and users' interaction.

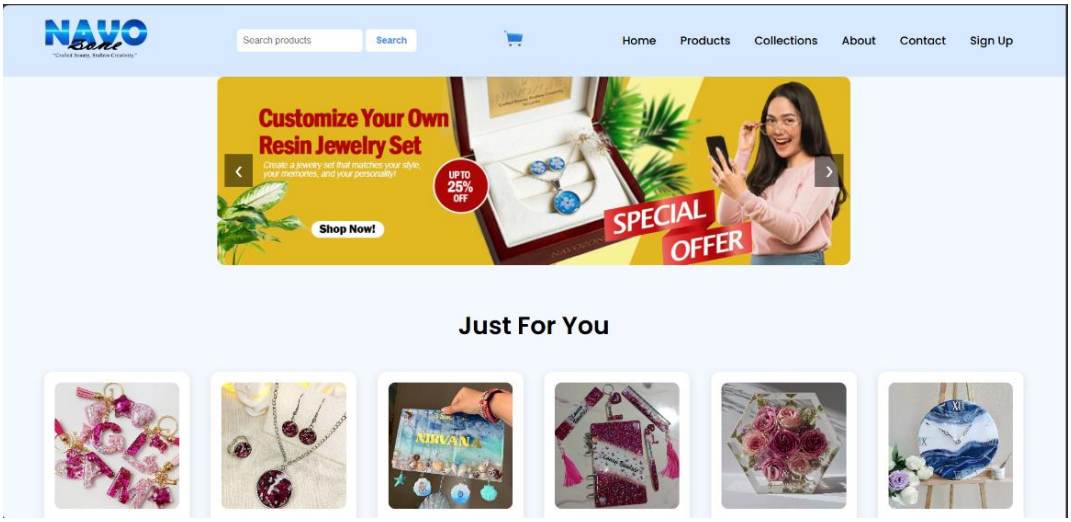

9 .Conclusion

The NAVO ZONE website has been successfully developed as a functional e-commerce platform for handmade resin products. It provides users with an intuitive shopping experience and improves the business's online presence.

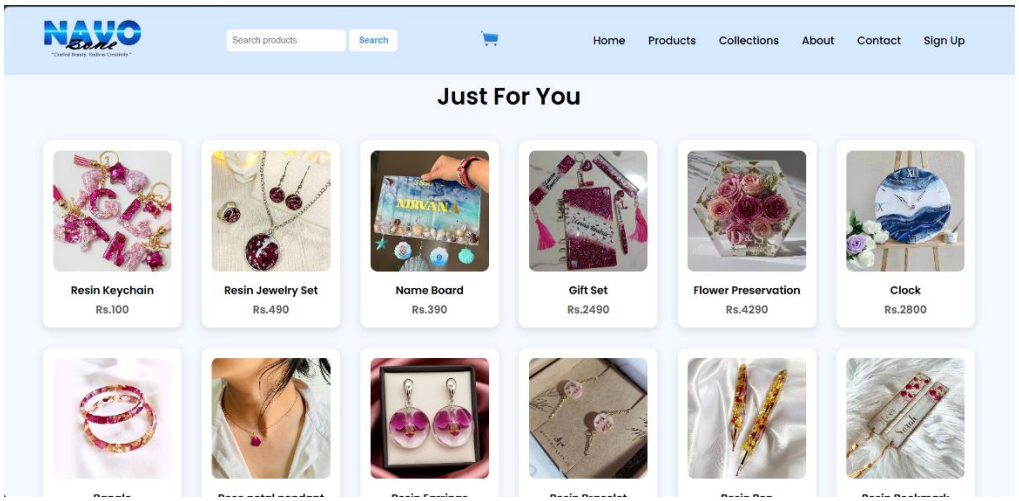

This project demonstrates the effective use of **HTML, CSS, and JavaScript** in developing a fully functional website. It also highlights how digital platforms can enhance business growth and customer engagement.

Team Member Contributions

This project was completed as a group effort. Each member contributed to different parts of the website design, development, and documentation process. The responsibilities were divided to ensure smooth workflow and successful completion of the project.

Member 1 : W.G.A.N.Weerasinghe – MGT/2023/242

(Website Development, UI Design & Project Finalization)

I contributed to the project by designing and developing the entire website, including its layout, structure, and overall visual design. The website was fully created and implemented using HTML, CSS, and JavaScript. A suitable color scheme, typography, and UI style were carefully selected and applied to ensure consistency and visual appeal. Images were integrated effectively to enhance user experience and create a user-friendly interface. Key features such as the navigation system, homepage structure, product display, and collections layout were developed to ensure smooth functionality. The website was also made fully responsive for both mobile and desktop devices. Overall testing and debugging were carried out to improve performance, functionality, and user experience. Finally, the complete website project was finalized by combining all components into a fully functional system, and the entire project report was prepared with proper structure and final responsibility taken to complete and finalize the project successfully.

Member 2 : W.M.S.C.S.Wanninayake - MGT/2023/414

At the beginning of the project, I contributed by discussing suitable ideas for the website and supporting the initial planning process. I participated in group activities and assisted in basic website development tasks when required. I also helped in collecting some information for the report and supported team coordination during the project.

Member 3 : P.Vidhurshan - MGT/2023/279

I contributed to the project by assisting in researching relevant information for both the website and report. I supported the development process by helping with basic website tasks and content organization. In addition, I assisted in preparing sections of the report and worked with the team to complete the project activities.

Member 4 : L.I.S Ruwandi – MGT/2023/065

I contributed to the project by supporting the preparation of the report and assisting in basic website development tasks. I helped in gathering relevant information and organizing content for the website. I also participated in group discussions and supported the team throughout the project work.
